Career Objective

Computer Science (AI & Machine Learning) undergraduate with a strong grounding in data structures, algorithms, and full-stack web development. Experienced in building and testing REST APIs using Postman, and developing frontend and backend features with React.js and Node.js. Comfortable working across the full development cycle, with a focus on writing clean, maintainable code.

Skills

Languages: C++, Python, JavaScript, TypeScript
Frameworks & Libraries: React.js, Next.js, Node.js, Express.js
API Development & Testing: REST APIs, Postman, CRUD Operations, Authentication Session Management, Functional Testing
Databases: Supabase, MongoDB, MySQL
AI/ML & Cloud: AWS (Basic), Google Cloud APIs, ML Model Integration, Speech-to-Text, Text-to-Speech APIs Basic CI/CD (GitHub Actions)
Version Control: Git, GitHub, GitLab, Git Workflow
Developer Tools: VS Code, Linux , Docker (Basic)
Core CS Subjects: Object-Oriented Programming (OOP), DBMS, Operating Systems, Data Structures & Algorithms

Internship

Backend & Full-Stack Developer Intern	June 2025 - Dec 2025
<i>NullClasses</i>	<i>Remote (Paid)</i>
- Engineered scalable full-stack applications using React.js and Node.js, reducing API response time by 30% through optimized CRUD operations - Architected responsive, high-performance user interfaces with Next.js, Tailwind CSS, improving cross-device usability and engagement. - Integrated and validated 5+ secure third-party REST APIs using Postman, improving backend reliability by 25%.	

Projects

🔗 Krishiora <i>Full-Stack Developer</i>	Ongoing
- Developing a scalable smart agriculture platform using React.js, Node.js, Express.js, TypeScript, and MySQL following a modular backend architecture. - Building secure RESTful APIs for farmer management, crop planning, marketplace, and weather-based advisory with JWT authentication and role-based authorization. - Integrating third-party services including Weather API, Google Maps API, and AI-powered crop recommendation to improve farming decisions. - Designing normalized MySQL database schemas, implementing CRUD operations, and managing version control using Git and GitHub.	
🔗 Interview AI Agent (Oralytics AI) <i>Full-Stack + AI/ML Developer</i>	Jan 2026 - Mar 2026
- Designed an AI-powered mock interview platform with real-time question-and-answer processing and an automated evaluation system. - Implemented machine learning models to analyze responses and generate dynamic performance scores with actionable feedback. - Deployed Speech-to-Text and Text-to-Speech systems to enable seamless voice-based interactions within a scalable Node.js backend.	
🔗 Uber Clone <i>Full-Stack Developer</i>	Sep 2025 - Mar 2026
- Engineered backend services and RESTful APIs for real-time ride matching and driver allocation logic. - Tested REST APIs using Postman and verified authentication, authorization, and CRUD workflows. - Implemented a responsive frontend using React, integrated with backend services, and optimized database interactions.	

Awards & Certifications

- HackQuest 2025:** Participated and developed a software solution in a national-level hackathon at UIT Allahabad (2025).
- FlutterFlow Hackathon (IIIT Allahabad):** Ranked in the Top 5 for rapid application development and deployment (2025).
- Certifications:** AWS Educate Cloud 101 (2025), C++ Crash Course (Udemy, 2024).
- Guvi SaWIT.AI Challenge:** Recognized for AI/ML project execution and integration.

Education

Pranveer Singh Institute of Technology, Kanpur	Expected Graduation: 2027
<i>Bachelor of Technology (B.Tech) CSE(AI/ML)</i>	
Dwarka Prasad Public School, Prayagraj	2022
<i>Senior Secondary (Class XII, CBSE)</i>	
Bishop George School, Prayagraj	2020
<i>Secondary (Class X, ICSE)</i>
